

1. Click the “Notice” button at the right down corner, then enter to “all setting”

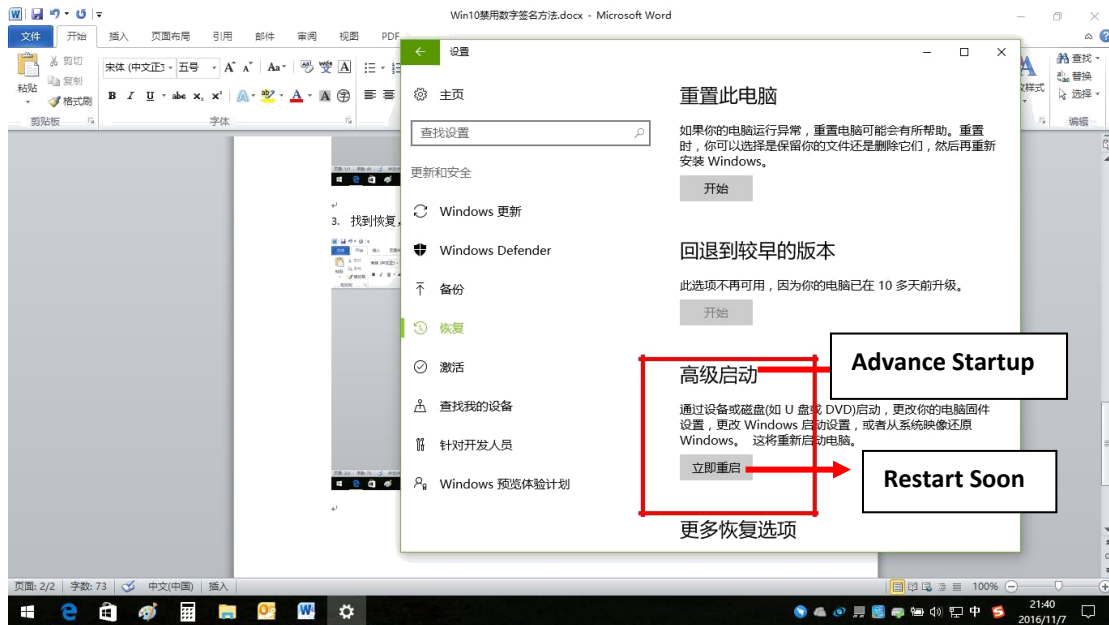

- 2, find the “Update and Safety”, like the photo below:

3. Get “Renew/Recovery”, click “ Advance startup”—“Restart Soon”

4. After restart, select
“Troubleshoot”

5. Select Advanced Option

6. Select “Startup setting”

7. Click “Restart”

8. Input “7” to disable driver signing.
